

SC-810 DIVER RECALL

SC-810 DIVER RECALL

The Diver Recall is used during diving missions as an indicator of when the divers must resurface. The product is activated using a striker ignition system, after ignition the product is dropped into the water where it will sink at a set rate before producing a loud report and a visible flash underwater.

FEATURES AND BENEFITS

- ✓ Improved compositional performance in sound and flash output
- ✓ Functions underwater
- ✓ Robust design for rough handling
- ✓ Wide operational temperature range: -18°C to +32°C
- ✓ Sinks to ensure divers at deeper levels are alerted
