

# SC-116 (M116A1) – SIMULATOR HAND GRENADE

The Simulator, Hand Grenade is designed for training exercises to acclimatize troops to the sights and sounds of battle in a non-lethal format. This device, once the pull-wire is activated, after 6 – 12 seconds produces a loud report or simulated explosion of a grenade.

## FEATURES AND BENEFITS

- ✓ Generates 125 dB (minimum) report measured 23m from source
- ✓ Operating temperature range -40°C to 52°C
- ✓ Produces definitive visible flash
